

Homeschooling Tips

Here are a few tips to help students gain the most out of homeschooling:

Self-Motivation

Self motivation & limiting distractions at home while studying is the key to effective homeschooling. Make sure to set up your study area away from distractions to stay focused.

Know Your Style

Students may use different modes of learning: visual, audio, textbooks, hybrid, and more. Discover what you are most comfortable with and proceed accordingly.

Be Consistent

Develop a study schedule according to the time of online classes and stick to it. Make sure to submit your assignments on time.

Take Breaks

Don't forget to include breaks in your schedule. Utilize the breaks to get up and do some physical activity.

Ask For Help

Educating at home may be a new experience for many students. Don't hesitate to ask for help from your peers, parents and teachers.
