

## Steps Taken By Killeen ISD To Protect Students & Staff From Covid-19

Killeen ISD is committed to the health and safety of its students and staff during the ongoing pandemic.

A few changes Killeen ISD has made in adherence to this goal include:

The "We Can Do This" educational campaign aims to spread awareness for protocols student and staff can follow to help stop the spread of COVID-19.

The campaign stresses on the importance of covering the mouth while coughing, properly washing hands, and wearing a mask.

Killeen ISD is utilizing KISD-TV, videos, Facebook, and flyers to help get this information to the public.

Parents and staff are notified via email about COVID-19 positive cases in a campus or department.

Killeen ISD's COVID-19 Dashboard displays the number of PCR lab-confirmed COVID-19 cases in its schools.

Killeen ISD also provides information about testing sites at the link [https://www.killeenisd.org/COVID19\\_vaccine](https://www.killeenisd.org/COVID19_vaccine) in a bid to encourage members of the community to get vaccinated.

Killeen Independent School District is also providing free COVID-19 rapid screeners.

Killeen ISD is adhering to guidelines released by the Bell County Health Department and Center for Disease Control to the best of its abilities.
